

Employment Opportunities:

Since the firm was founded in 1968, it has provided services for over 5000 projects ranging in size from a few test borings to full geotechnical engineering services for locations throughout the south eastern United States. Beaver Engineering presently employs two engineers, five engineering technicians, two drillers, and a three-person office staff. We make about 100 geotechnical investigations in Middle Tennessee each year, and make construction observations on about 150 projects each year. We test soils delivered to our laboratory from all over the United States, providing assistance to environmental firms and laboratories, geotechnical firms, contractors, and owners.

At this time we have the following opportunities:

DRILLER'S ASSISTANT/FIELD TECHNICIAN
